Hi Mr. Moore,

I have been interested in the CES contamination problem in Harris County, and I would really like some more updates on the land there.

The last date I see of updates from the site dates in 2015. I would really like the latest update of the state of the site, along with some answers to some of my questions.

- 1) Are there any more harsh chemicals that can danger the residents? If so, what are they and how do they harm people?
- 2) What is the EPA doing to help the site currently, and what is all that they have done?
- 3) What are the PRP companies, and what are they doing, or did, to help?
- 4) What are the statistics of chemicals still on the site?

Sorry to bother you with these questions, but I would really appreciate your time!

Thank you -A
